TATRA DEFENCE VEHICLE (TDV) company on a base of partnership with General Dynamics European Land Systems has a licence, know-how and technology for development of various versions of Pandur II 8x8 as well as their production, modernization or upgrade. TDV is an exclusive producer and supplier of Pandur II 8x8 vehicles for dedicated territories and is at the same time exclusive service supplier for Pandur II 8x8 CZ vehicles in service with Army of the Czech Republic. TDV is also working on new modifications and improvements to the Pandur II 8x8.

Pandur II is a modular armoured vehicle with all-welded hull with ballistic protection up to level 4 and mine protection up to level 3 (customer choice) according to STANAG 4569. Some of the versions are amphibious. Vehicle configuration also offers CBR protection system. The vehicle has a driver compartment and an engine-gearbox set placed at the front of the vehicle, a crew compartment in the middle of the hull and the place for a troop at the rear of the vehicle.

The crew consist of 2-3 persons to the version of the vehicle, max. capacity is 14 soldiers incl. crew. Drive train solution is consisted of powerpack including six cylinder inline diesel Cummins ISLe engine and fully automatic ZF transmission. Pandur II is designed to be transportable by cargo aircraft such as C-130 Hercules, A400, C-5, etc.

Pandur II 8x8 wheeled armoured vehicles are being manufactured by the TDV company in many variants according to the customer requirements. The vehicles can be equipped with high-tech turret systems with variable ammunition, including 7.62 mm or 12.7 mm machine guns, grenade launchers or 30-105mm guns or mortar combat systems, anti-aircraft system, anti-tank guided missiles, etc.

Pandur II 8x8 vehicles are manufactured in the following configurations: infantry fighting vehicle, armoured personnel carrier, fire support vehicle, ambulance vehicle, command post vehicle, mortar carrier, recovery vehicles, radio or reconnaissance vehicle, etc.
